

Trans Boundary Studies

Challenges and possibilities

AIM

Study: how to improve Flemish – Brabant cooperation

- Four phases:
 1. policy in Flandres and Brabant
 2. inventory on available data and used models
 3. make a trans national model
 4. make a communication tool.

WHY?

WHY?

Results

- From the study we learned:
 - Many data, many models
 - No trans national models and data available
 - Many organisational differences
 - Differences in responsibilities and money flow

Solutions

- Work more together on
 - Project level
 - Same responsibility level e.g. provinces
 - Trans border exchange of knowledge
 - Trans border exchange of experiences
- Do this in:
 - Trans border river basins
 - Trans border items (quality, quantity)

How?

- On project level
 - Interreg projects
- On discipline or responsibility level
 - River basin approach
 - Flood prevention
 - Trans national modelling
 - Trans national data exchange

lied

- En ik sta hier alleen aan een waterig pad
- Ik heb eigenlijk nooit last van water gehad
- Maar de mensen ze slapen veilig in huis
- En dan denk ik aan Brabant want daar ben ik thuis.

- la., la , la , la ,la
- En dan denk ik aan Brabant want daar ben ik thuis.
