

Waterschap
De Dommel

New functions to old values

Redesigning the Tongelreepvalley

Joost van der Crujzen

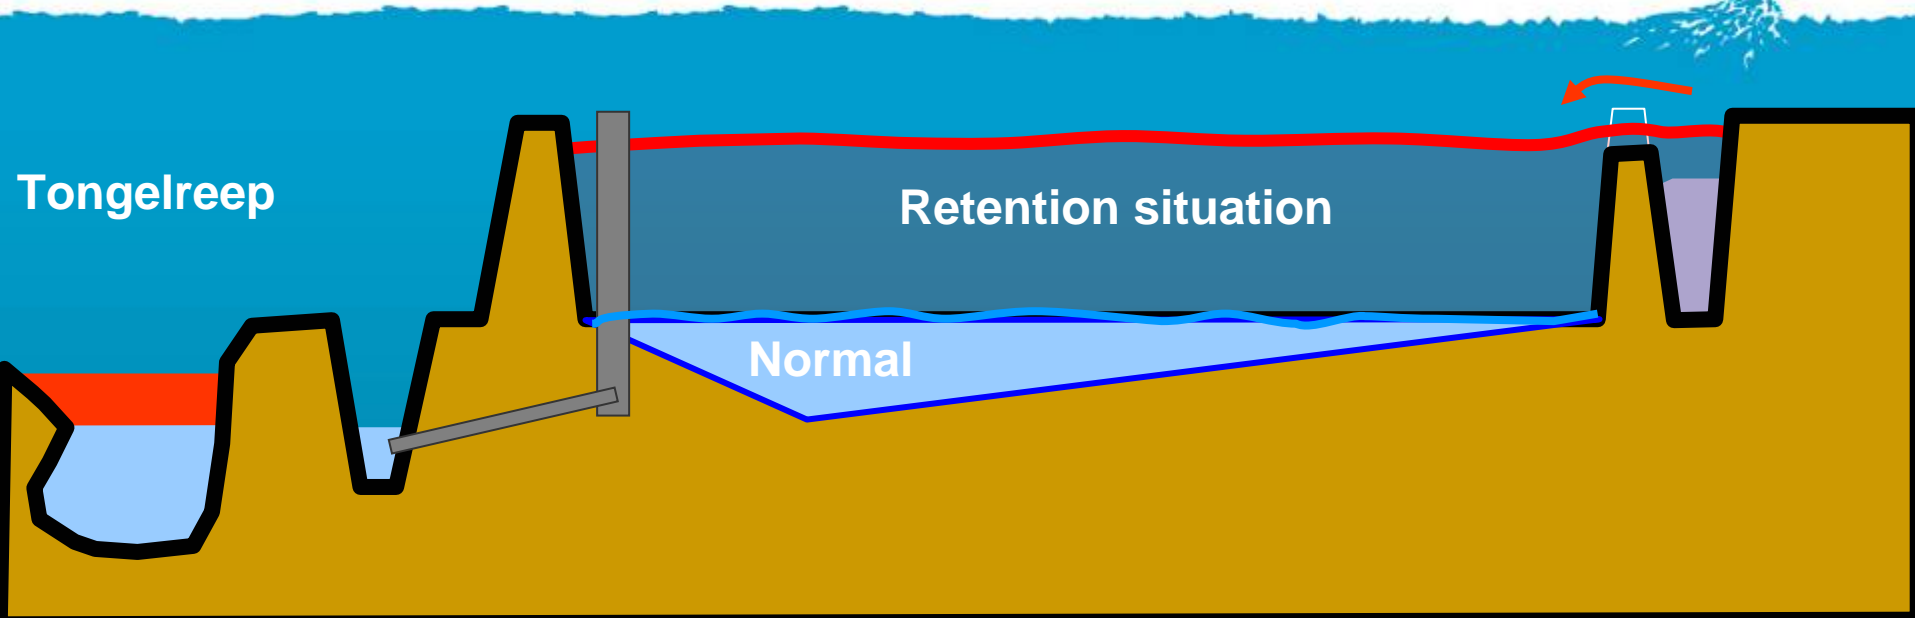

Main Arguments

- Floods near Eindhoven: flooding in urban area
- Morphology and ecology: straight course of the Tongelreep due to fishbreed basins

Retention in former fishbreed basins

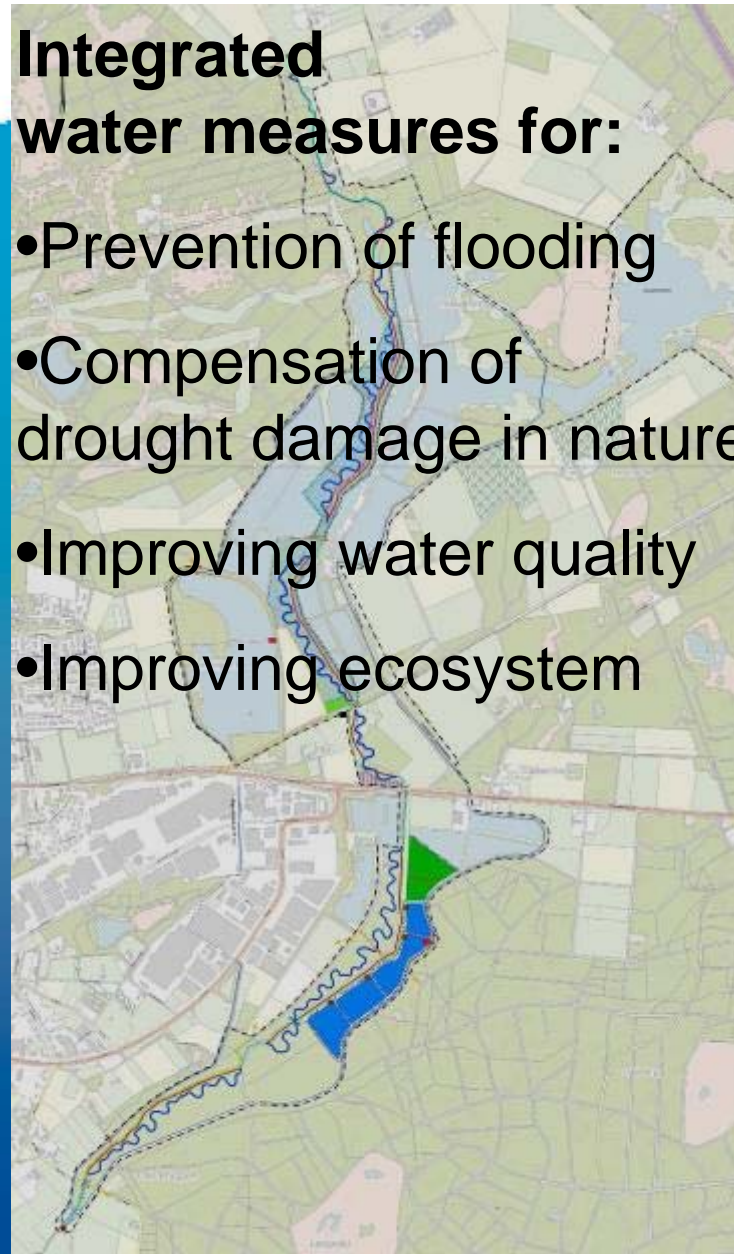

Integrated water measures for:

- Prevention of flooding
- Compensation of drought damage in nature
- Improving water quality
- Improving ecosystem

Succes by coöperation

Water Board De Dommel

NGO: Brabants Landschap

Municipality Valkenswaard

NGO: State Forest Service
